Life without labor is guilt. Labor without art is brutality.

- John Ruskin
What John Michael Kohler saw in 1883 when he looked at a cast-iron horse trough was the bathtub that launched a global plumbing company. That pioneering spirit of ingenuity – the kind that sees a bathing revolution in a horse trough – has defined Kohler Co. from its earliest days. A visionary, John Michael Kohler understood the importance of innovative design and an uncompromising commitment to craft and quality. After four generations, we remain a family-owned company, with over 26,000 products and 13,000 patents to our name. Still leading the industry in innovation and quality. Bolder than ever.
Our showering tastes are as varied as our personalities. Whether you need a brisk wake-up rinse before work, a full-on therapeutic shower after a weekend of physical activity or a mere slice of precious personal time, KOHLER® showering components give you everything you need to rejuvenate. In addition to our innovative shower systems, we offer shower stalls, bases and doors in a range of styles and sizes, along with accessories to match.

For design ideas and planning tips, we invite you to visit KOHLER.com/BathroomGallery.

The Infinite Possibilities of KOHLER® Showers

Whether you’re designing a custom luxury shower, remodeling the kids’ bathroom or simply replacing a showerhead, Kohler has a solution. With everything from digital shower systems and innovative spray experiences to line-matched trim in styles and finishes to suit every décor, we can walk you through an easy upgrade or help you create a home-spa retreat.

Designing the shower of your dreams?

What if the possibilities were infinite? What if you could create a custom shower that delivered everything from water and steam to music and chromatherapy – all digitally programmed just for you and your family?

1 Stimulate your senses

As you design your dream shower, you’ll want to think about the water delivery options you’d like to experience on a daily basis – targeted bodysprays, the downpour of a rainhead, and the versatility of handshowers and multifunction showerheads. Along with water experiences, consider adding SoundTile® speakers for music or a WaterTile® Ambient Rain® shower panel for chromatherapy.

2 Personalize your experience

Convenient, intuitive control of every component from water delivery to music selection is essential in creating a customized, luxuriously comfortable showering experience. You can rest assured our digital and manual thermostatic valves not only support each component with steady temperature and water flow but also give you complete, easy-to-navigate control of your showering space.

3 Maximize comfort, customize control

If you love the soothing mist of steam to help you unwind and relax, and moisturize your skin, we have all the components you need to create your own personal steam shower. Our Fast-Response® steam generator, steam head and control can stand alone or be combined with our DTV® II digital showering system. Add a KOHLER® steam door and you’re ready to go.

Playing up the shower in your bath/shower remodel?

What if you could bring a new level of sophistication to your showering space and treat yourself to a performance shower experience – all in that five-foot alcove? We’ve listed a variety of options below to help you plan your shower remodel.

1 Install a shower base

If you’d like to turn your bath/shower into an elegant showering space, we offer both shower bases, made of KOHLER® Enameled Cast Iron or acrylic, as well as shower stalls. Available in an array of styles, colors and sizes, several of our bases and stalls also feature an integral seat. And if clutter is a concern, Shower Locker® units will help keep your shower organized.

2 Add a shower door

Keep your new shower looking clean and contemporary by adding a shower door. Our pivot and sliding shower door selection includes semi-frameless and frameless styles, as well as glass and finish options. All doors feature CleanCoat®, a surface treatment that makes it easier to remove hard water spots by creating a protective barrier that repels water and prevents dirt and water minerals from collecting.

3 Upgrade your water experience

Remodeling from a bath to a shower gives you the opportunity to truly enhance your shower experience in a five-foot space. With a high-flow pressure-balancing valve, you can enjoy up to 13 gallons of water per minute. Pair with a three-way transfer valve, and choose from up to three water delivery experiences – running individually or two at a time. And if you’re looking for a versatile, digital solution for one or two water delivery components, DTV Prompt® is the answer.
Install a shower base

Upgrade your water experience

Add a shower door

For more information, see pages 22-23.
Time to upgrade your shower?

What if you could replace your showerhead, upgrade your handshower and refresh the trim in your shower – all without changing the plumbing? Here are three easy options for updating your shower design and experience.

1 Replace your showerhead

A simple showerhead replacement can completely change your showering experience. Try spicing up your shower with a multifunction showerhead, or drenching yourself with big, luxurious water droplets beneath an air-induction showerhead.

2 Add a handshower

Introducing a handshower is an easy update with KOHLER® handshowers, diverters, slidebars and brackets. A range of single- and multifunction spray experiences, including Flipside® handshower with four unique sprayfaces, allows you to add versatile functionality to the shower. Handshowers offer a smart design solution for the family bathroom.

3 Update your bath/shower trim

With the KOHLER valve platform, you can refresh the look of your shower simply by replacing the trim. If your current shower is powered by a KOHLER valve, you can update the trim with a fresh new design – from sleek modern angles to classic elegance – without making changes behind the walls. Most of our current trim pieces are compatible with the KOHLER valves we’ve introduced over the years.

Multifunction Showerheads

If you like a shower that keeps pace with your day – an invigorating wakeup shower, a massaging after-workout shower or a relaxing evening shower – a multifunction showerhead is the way to go. We offer a range of multifunction spray experiences, including water-saving options, to suit a variety of intensity preferences. Most of our multifunction showerheads feature:

- Easy-to-clean MasterClean™ sprayfaces
- Quick-adjusting sprayheads

Single-Function Showerheads

If you love a straightforward, incredible spray experience every time you step into the shower, a single-function showerhead is ideal. Our single-function showerheads include classic, Katalyst air-induction and water-saving spray options – all engineered to deliver simple, luxurious water experiences day in, day out. Most of our single-function showerheads feature:

- Easy-to-clean MasterClean sprayfaces
- Exceptional low-pressure performance ensured by an innovative racetrack waterway
- Line-matched designs and finishes

Rainheads

KOHLER® rainheads feature Katalyst spray technology, a revolutionary air-induction system with enhanced spray-nozzle configurations. They offer complete coverage with full, heavy water drops for a powerful, thoroughly drenching shower experience. Rainheads are manufactured of solid brass for a lifetime of reliable performance.

Water Delivery Considerations

As you design your shower, you’ll have a range of water delivery options to consider. We’ve grouped products into six categories, explained below. If you’d like additional help determining which makes sense for your home, we invite you to visit KOHLER.com/Showering or to contact your showroom representative.
Multifunction and Single-Function Handshowers

Handshowers are great for the family shower and can function in place of or in combination with a wall-mounted showerhead. Install your handshower with a slidebar and brackets to enhance the functionality of your shower and accommodate a range of heights—both adults and children. Most of our handshowers feature:

- Easy-to-clean MasterClean™ sprayfaces

Bodysprays

From low-profile to multifunction, KOHLER® bodysprays offer a variety of hydrotherapy experiences. Designed to complement any décor, our bodysprays introduce another way to experience water in the shower.

Shower Packages

Take the guesswork out of designing a custom shower with one of our shower packages. From essential to luxury, our packages include all the components you need to create a truly satisfying showering experience in your master or secondary bath. If you’re looking for a simple, stylish solution, our bath/shower trim sets provide you with the basic essentials for an outstanding shower.

Katalyst, Single-Function Spray

Big, Drenching Droplets

Every drop of water feels bigger and more luxurious with Katalyst air-induction technology. By infusing two liters of air per minute, Katalyst delivers a powerful, indulgent spray that clings to your body with large, full drops. We offer 2.5 gpm showerheads as well as 2.0 gpm showerheads that let you save water without sacrificing performance. The waterway and sprayface of our WaterSense®-labeled 2.0 gpm showerheads have been specially engineered to help you reduce water consumption by up to 20% without sacrificing the power and performance of the air-induction spray. Katalyst single-function spray is available on a wide variety of line-matched showerheads.

Water Delivery

To view additional handle styles, visit KOHLER.com/Faucets.
One of the first steps in designing a shower is deciding which types of valves and controls you prefer – digital thermostatic, manual thermostatic or pressure-balancing. A leader in valve design, Kohler offers highly precise valves that deliver consistent temperature and water flow in a wide range of pressure settings. We’ve designed our valves to be easy to install and compatible with an extensive selection of shower trim. Engineered to ensure every showerhead, handshower and bodyspray performs at its best, our valves have what it takes to meet the innovative functionality and exacting standards of today’s custom showers. To help you determine which valve is right for your shower, take a look at the following pages and talk with your showroom representative.
Valves & Controls
Which Valve System Is Right for You? 66

Manual Thermostatic 72
Pressure-Balancing 78
Which Valve System Is Right for You?

Pressure-Balancing
Manual Thermostatic
Digital Thermostatic
Pressure-Balancing

Sometimes simple, understated is the way to go. Our pressure-balancing valves are an all-in-one solution that lets you turn the shower on and off as well as control water temperature with one handle. Typically used with a showerhead or handshower and bath spout, pressure-balancing valves are a great solution for a shower used by children or guests. Step up your experience with a transfer valve and run up to three components.

- Anti-scalding feature
- Control water flow and temperature with HiFlow Rite-Temp® pressure-balancing valve
- High-flow valve configurations with up to 13 gallons of water per minute (gpm) flow rates allow multiple water delivery options

Manual Thermostatic

If you want to take a basic shower to the next level, a manual thermostatic system is the right choice for you. Perfect for elaborate customized showers, manual thermostatic valves let you set the temperature once and never have to adjust it again. Enjoy complete control of your showering experience using separate volume control valves to adjust the flow of each water delivery component – showerheads, handshowers, bodysprays – individually.

- Anti-scalding feature
- Senses and maintains consistent water temperature
- Once you adjust the temperature to a comfortable setting, you don’t have to worry about resetting it with every shower
- Support even the most complex shower system up to 17.2 gpm with thermostatic valves
- Patented shuttle delivers precise, consistent temperature control at the full range of flow rates
- Easy and flexible to install with our patented K-joints

Digital Thermostatic

Turn your shower into a spa-like retreat with one of our digital thermostatic valves – DTV Prompt®, DTV+, or DTV II. Our digital showering systems invite you to create personalized sensory experiences with water, steam, lighting and music – all controlled with an easy-to-use, intuitive interface. Eliminate the multiple levers and knobs of a custom manual shower, and design a clean, uncluttered shower space with a digital showering solution.

- Anti-scalding feature
- Senses and maintains consistent water temperature
- Easy-to-read LCD control displays
- A precision-engineered digital thermostatic valve that offers easy plug-and-go installation
- DTV Prompt offers an affordable digital showering solution with 2 outlets and 13 gpm maximum flow rate
- DTV offers the ultimate in personalized hydrotherapy, controlling temperature and spray intensity for up to 6 outlets and 21 gpm maximum flow rate all in one easy-to-use system
- DTV II incorporates steam, music from your own playlist and chromatherapy with up to 6 outlets and 21 gpm maximum flow rate for a custom-designed experience
## Selecting Your Valve

We have outlined a few of the most common showering configurations below. Use the chart to determine which showering system is right for you and your family.

Bring the soothing benefits of a relaxing steam shower home with KOHLER® of steam components. We offer all the features you need to create a personal steam environment in your home. Our innovative Fast-Reponse generator delivers steam in one minute. KOHLER steam heads are available in finishes to match your showering components. To determine which steam generator is right for your space, use the calculator tool that follows or visit KOHLER.com/SteamCalculator.
Steam

Control Kits & DTV 92
Steam head (K-1663-CP)
We’ll help you choose the basic elements of your steam shower in three easy steps. Once you’ve determined the size of your shower, it’s just a matter of choosing the generator and control kit that work best in your space and provide the right experience.

1. Determine your steam generator size

Calculate the shower’s cubic footage (cubic feet = width x height x depth). Recommended ceiling height is 8’ or less. Find the resulting cubic footage below to determine the size of the generator required.

*Includes Power Clean™ technology

2. Choose between standard and Fast-Response® options

Our standard steam generators are available in multiple sizes and are UL® Listed for your safety. KOHLER® Fast-Response steam generators produce steam in the shower within one minute of pushing the power button. The Fast-Response units also have the Power Clean feature, which allows the user to activate an automatic cleaning function to ensure proper, safe maintenance of the steam generator. At the touch of a button, sediment is flushed out of the generator through the steam head, instead of the manual flushing required on the standard steam generators. Fast-Response steam generators are required if using the DTV® II digital platform.

3. Select a finish for the control kit

Control kits for KOHLER steam generators consist of a control and steam head. The control regulates time, temperature, on/off and the Power Clean function. The steam head is where steam is released from the generator into the shower. With a control kit, it’s easy to match your choice of faucet finishes.

**No gold content**
KOHLER® shower components are available in a wide array of finishes. See page 148 for details.

For more details on Lattis pivot shower doors, see page 120.
Today’s master baths frequently separate the bath and shower, creating two perfectly planned sanctuaries of relaxation and cleansing. To help you create your ideal shower space, our shower bases and stalls offer flexibility in design and enhanced features. Shower stalls provide a seamless solution with integrated floor, walls and seating while shower bases coordinate well with tiled or glass walls. Explore your options on the following pages.
Showers
Shower Bases 98
Shower Stalls 110
Shower Bases & Stalls

If you prefer to showcase beautiful tile or stone, spend some time browsing our shower base selection. For a seamless solution, consider KOHLER® one-piece shower stalls. Your showroom representative can help you determine which shower type is right for your home. For more information, visit KOHLER.com/Showering.

Shower Bases

KOHLER shower bases are available in a wide range of sizes and shapes from square to neo-angle – perfect for remodeling. In addition, we offer both acrylic and KOHLER Enameled Cast Iron shower bases in a variety of colors to help you personalize your shower.

Concealed Drain

Select KOHLER shower bases feature the sleek look and added comfort of a concealed drain. This unique design element combines a recessed drain with an attractive removable teak, metal or acrylic drain cover, creating a smooth shower base surface.

Bases with Seats

Whether you’d like the comfort of a shower seat now or you’re planning for the future, our spacious integral seats let you relax in the shower. An excellent complement to custom walls, our shower bases enhance and highlight the appearance of materials including tile and stone.
Shower Stalls
Available in a wide range of sizes and colors that complement KOHLER® fixtures, our one-piece high-gloss acrylic shower stalls resist chipping and make installation and cleaning simple.

Stalls with Seats
Several of our shower stalls feature spacious integral seats, providing a safe, comfortable place to relax or shave while you shower.

ADA Shower Stalls
Select models feature molded-in textured floors and low thresholds that allow wheelchair access. Factory-installed grab bars complete the ADA-compliant solution.

*ADA-compliant products will comply with the Americans with Disabilities Act of 2004 when installed per the requirements of the accessibility guidelines of Section 608 (shower stalls) of the Act.

**To learn more about KOHLER® shower bases not featured in this catalog, please visit KOHLER.com/Showering.
When you think about shower doors, keeping water in the shower might be your first and only goal. Yet KOHLER® shower doors – available in a range of styles, shapes and sizes – can do so much more. They can enhance your design, create a visually open space, and allow light into your shower or create privacy with frosted or patterned glass. Our innovative CleanCoat® surface treatment makes it easier to remove hard water spots by creating a protective barrier that repels water and prevents dirt and water minerals from collecting. As the following pages show, options abound when you’re choosing shower doors – and we’ll help you create a space that’s both functional and beautiful.
Shower Doors

Pivot 119
Steam 120
Sliding 121
Screen 122
Shower Doors

With a wide array of styles, shapes and sizes, we’ll help you design a shower that fits your space and your aesthetic. Consult your showroom representative if questions arise, or visit KOHLER.com/Showering for more information.

Pivot

Also called swinging or hinge doors, frameless and semi-frameless pivot shower doors swing open like a traditional door and provide an easy-to-access, open shower environment and a clean, sophisticated look.

Steam

Available in pivot models, our semi-frameless steam doors form a tight seal to hold in steam, creating a spa-like environment in your bathroom.

Sliding

Typically chosen for baths and large showers, frameless sliding doors overlap with a smooth, quiet sliding action. Available in an array of styles, these doors also offer a practical, space-saving solution for bathrooms.
Bath Screen

With three accordion-fold panels, bath screens fold down to just 21⅞” when not in use and provide wide access to your shower. There's no track needed, creating a comfortable experience as you step in and out of your bath/shower.

Patterned Glass

Add design and privacy to your shower with patterned glass designs, available in Frosted, Cavata- and Falling Lines.

Finishes

Available in several finish options, our shower doors match KOHLER, faucets and accessories – so you can create a coordinated look throughout the bathroom.

Sometimes the little touches can make the biggest difference. That’s the case with our accessories. Our designers and engineers have studied how people shower – and how to make the experience more convenient and safer. We’ve thought of everything from baskets that place your shampoo right where you want it to grab bars that give you stability as you enter and exit the shower. Don’t let accessories be an afterthought. Explore our finishing touches on the following pages, and find convenient solutions designed to enhance your bathroom’s décor.

Finishing Touches

Give your shower the finishing touch with our expertly designed and engineered accessories. Ask your showroom representative for suggestions on how to add convenience and safety to your shower, or visit KOHLER.com/Showering for more information.

Baskets
An easy add-on that takes minimal space, our corner shower baskets – available in three sizes – can hold all of your shower essentials. Constructed of solid stainless steel, they offer long-lasting, corrosion-resistant performance.

Grab Bars
Give yourself an element of safety with stable grab bars designed to enhance your shower’s visual appeal. Available in an assortment of sizes, finishes and designs, KOHLER® grab bars feature durable premium metal construction.

Fittings
Our complete selection of fittings offers you exceptional functionality and coordinated design. Choose from slidebars, wall-mount handshower brackets, deck-mount handshower holders, slidebar trim, hoses, showerarm diverters, wall-mount supply elbows and showerarms. Your showroom representative can help you determine which parts you’ll need for your shower installation.
Shower Rods

If you've chosen a shower curtain instead of shower doors, extend your bathing space by 6” with the Expanse curved shower rod. Available in traditional, transitional or contemporary design, Expanse complements the Expanse bath and a wide range of bathroom aesthetics.

Lockers

Incorporate shelving right into your shower wall with a Shower Locker® unit. Designed to complement your showering environment without intruding on space, Shower Locker units are convenient and easy to clean.

Drains

Featuring solid-brass construction for durability and reliability, KOHLER® shower drains resist buildup. Ten finish options let you find the perfect match for your faucet and trim.
Kohler offers a wide array of fittings to help you design a custom showering experience without a complete remodel of your bathroom. Combine individual elements – wall supplies, slidebars, hoses, diverters, handshowers and showerheads – to create a luxurious shower tailored to your needs and lifestyle.

Glossary of Terms

Acrylic
A high-gloss material used in the manufacture of select KOHLER® shower bases and shower stalls, acrylic resists chipping and offers an easy-to-clean surface and rich color.

CleanCoat® Technology
This shower door surface treatment makes it easier to remove hard water spots by creating a protective barrier that repels water and prevents dirt and water minerals from collecting.

DTV®
Our precision-engineered digital thermostatic valve (DTV) can run up to eight different showering components with six ports, and it delivers up to 21 gallons of water per minute.

Diverter Valve
A diverter valve directs water to multiple outlets, such as to the bath faucet or the showerhead, allowing you to control separate components with just one valve. Unlike a transfer valve, diverter valves do not allow you to run two water components at once. This valve can be used with a Rite-Temp® pressure-balancing valve or thermostatic and volume control valves.

Digital Interface
Our digital showering system features intuitive electronic controls that allow you to operate and customize your shower experience at the touch of a button.

Flange
Many of our showerarms include a flange or ornamental plate to help conceal the area where the base of the showerarm meets the wall.

Glass Thickness
KOHLER shower doors are available in ¼”, ⅜” and ½” thicknesses. Both ⅜” and ½” glass provides a more substantial look and feel to the glass panels.

Katalyst® Spray
A revolutionary air-induction system that intensifies water’s rinsing ability and makes each drop feel bigger and perform better.

KOHLER Enameled Cast Iron
KOHLER Enameled Cast Iron is made in part with recycled material and comes in an array of colors. Our Lifetime Limited Warranty* guarantees it will not chip, crack or flex for life.

Komotion® Spray
One of the four flow options on Flipside® products, Komotion has a circular pattern for a deeper sense of an exhilarating massage.

Kotton® Spray
Kotton, one of the flow options on Flipside handshowers and showerheads, creates a soft, enveloping sense of relaxation.

Koverage® Spray
Koverage delivers a full-face spray for superb rinsing performance. It’s featured on Flipside products.

Kurrent® Spray
Kurrent, featured on Flipside handshowers and showerheads, eases away aches and pains and revitalizes with a targeted massage spray.

Pivot Door
Also called swinging or hinge doors, pivot shower doors swing open like a traditional door and provide an easy-to-access, open shower environment and a clean, sophisticated look.

Pressure-Balancing Valve
The Rite-Temp® pressure-balancing valve lets you precisely control your water temperature – 3 degrees of handle rotation changes the temperature by 1°F. If the hot or cold water supply is interrupted, the valve will automatically reduce the water flow.

* KOHLER Enameled Cast Iron shower bases installed in North America carry a Lifetime Limited Warranty for as long as the original consumer purchaser owns his or her home.
Rainhead
Featuring Katalyst® air-induction technology, KOHLER® rainheads deliver a powerful, thoroughly drenching shower experience.

Semi-Frameless vs. Frameless
A semi-frameless door has a metal frame mounted to the edges of the glass, adding structure. On a frameless door, heavier, thicker glass eliminates the need for structural framing and creates a sleek, contemporary look.

Shower Locker® Units
An ergonomic way to store essential shower items, KOHLER® Shower Locker units are available in two designs: a self-rimming model and a tile-in model. Durable and attractive, both Shower Locker models offer a convenient, integrated storage solution.

Sliding Door
Typically chosen for baths and large showers, sliding doors overlap with a smooth, quiet sliding action. They’re available in an array of styles, to coordinate with any décor.

Stacked Thermostatic Valve
Our MasterShower® stacked thermostatic valve pairs volume and temperature control into one assembly, for precise control and a clean, simple design. A 104°F comfort setting and 120°F high-temperature stop limit provide safety and flexibility. The one-piece forged brass body is built to last and eliminates potential leak paths.

Steam Door
Steam doors form a tight seal to hold in steam, creating a spa-like environment in your bathroom.

Thermostatic Valve
With separate volume and temperature controls, our MasterShower thermostatic valve – featuring an innovative shuttle design – gives you total control of your shower environment. The one-piece forged brass body is built to last and eliminates potential leak paths.

Transfer Valve
Used in conjunction with a Rite-Temp pressure-balancing valve or with thermostatic and volume control valves, the 3-way transfer lets you choose from six different outputs with a simple turn of the handle.

Transom
A transom is a window above a door. The Lattis® pivot door is available with a sliding steam transom that allows you to control the amount of steam contained in your shower.

Volume Control Valve
Required with the MasterShower thermostatic valve, our volume control valves give you precise control of the amount and intensity of water flow for your showerheads, handshowers and bodysprays.

WaterSense®
A partnership program by the U.S. Environmental Protection Agency that seeks to protect the future of our nation’s water supply by offering people a simple way to use less water with water-efficient products, new homes, and services. For the full definition and to learn more, visit epa.gov/WaterSense.

Thank you.

If you’d like to learn more about Kohler and our complete product offering, we invite you to take a look at our literature, visit us online or stop by a KOHLER® Showroom.

Literature
Concise and easy to use, our full-line category books inspire you to create beautiful spaces and guide you through choosing kitchen and bath products that are right for you and your home.

In addition, bold magazine features ideas we’re passionate about, the latest introductions to the KOHLER kitchen and bath lines, as well as a selection of our timeless, classic offerings.

View the full magazine at KOHLER.com/LiteratureStore. There you can download additional category books and brochures. KOHLER literature also can be ordered by calling 800-4-KOHLER.
